JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 213 (1986)

SUBJECT INDEX

Aldehydes,
polarographic reduction of ——— and ketones. Part XXVI. Electroreduction and electrooxidation of pyridinecarboxaldehydes in alkaline solutions (Rusling, Zuman) 277
Polarographic reduction of ——— and ketones. Part XXIV. Electroreduction of pyridinecarboxaldehydes in acidic solutions (Rusling, Zuman) 245
Polarographic reduction of ——— and ketones. Part XXV. Electroreduction of pyridinecarboxaldehydes in aqueous buffered solutions (Rusling, Zuman) 255

Amino acid,
direct electrochemistry of horse-heart cytochrome *c* at ——— modified gold electrodes (Di Gleria et al.) 333

Anodic stripping voltammetry,
theoretical considerations on square wave and differential pulse voltammetry applied in ——— with use of mercury film electrodes (Penczek, Stojek) 177

Auger spectroscopy,
electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and ——— (Stickney et al.) 293

Bilayer films,
electronically conducting poly-tris(5,5′-bis[(3-acrylyl-1-propoxy)carbonyl]-2,2′-bipyridine)ruthenium-modified electrodes. Studies of ——— and solution redox reactions (Elliott et al.) 203

Bismuth,
electrocatalytic influence of underpotential Tl, Pb and ——— monolayers on the electochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions (Kokkinidis et al.) 135

Brain tissue,
effects of restricted diffusion at ultramicroelectrodes in ———. The pool model: Theory and experiment for chronoamperometry (Amatore et al.) 31

Cadmium,
determination of stability constants of some ——— complexes by polarographic techniques in the presence of electrode adsorption (Casassas, Ariño) 235

Carbon,
on the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of ——— in hot H_3PO_4 (Dhar et al.) 161

Carbon monoxide,
infrared spectroscopic study of methanol and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from ———, CH_3OH and HCOOH (Kunimatsu) 149

Cobalt tetrasulphonated phthalocyanines,
spectro-electrochemistry of iron and ——— (Nevin et al.) 217

Convection,
geometric influences on the spontaneous passivation of copper in alkaline hexacyanoferrate(III) solutions under conditions of free ——— (Köhler et al.) 75

Coordination environment,
dependence of heterogeneous charge transfer rate on ——— in $MoO(L\text{–}L)(S_2CNEt_2)_2$ complexes (Schultz) 169

Copper,
geometric influences on the spontaneous passivation of ——— in alkaline hexacyanoferrate(III) solutions under conditions of free convection (Köhler et al.) 75

Cytochrome *c*,
direct electrochemistry of horse-heart ——— at amino acid modified gold electrodes (Di Gleria et al.). 333

Dc polarography,
a critical study of the use of logarithmic analysis as a criterion for elucidation of the reaction mechanism of electrodimerization processes in ——— (Ruiz) 23
2,4-Diamino-5-(3,4,5-trimethoxybenzyl)-6-chloropyrimidine,
electrochemical reduction of ——— (Vajtner, Lovreček) 111
4,4′-Dichlorobiphenyl,
oxidation of ——— at a ruthenium dioxide anode (Laule et al.) 329
Differential pulse voltammetry,
theoretical considerations on square wave and ——— applied in anodic stripping with use of mercury film electrodes (Penczek, Stojek) 177

Electrodimerization,
a critical study of the use of logarithmic analysis as a criterion for elucidation of the reaction mechanism of ——— processes in dc polarography (Ruiz) 23
Epoxy resin,
studies of the process of catalytic hydrogen evolution on the ———-impregnated graphite-based mercury film electrode (Cukrowski, Korolczuk) 127

Formic acid,
infrared spectroscopic study of methanol and ——— adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH (Kunimatsu) 149
Fourier transform faradaic admittance measurements,
solution resistance determinations for ——— (Fitch) 313
Fused ring systems,
comments on the paper "The electrochemical reduction of some ———" by H.M. Fahmy, B. Nashed, F.A. Khalifa, A. Abdel Moneim and M. Abdel Azzem, and on the short communication "On the electrochemical reduction of *N*-phenylmaleimide and related compounds" by H. Lund (Fletcher) 159

Gold,
direct electrochemistry of horse-heart cytochrome *c* at amino acid modified ——— electrodes (Di Gleria et al.) 333

Hexacyanoferrate(III),
geometric influences on the spontaneous passivation of copper in alkaline ——— solutions under conditions of free convection (Köhler et al.) 75
Hydrogen,
studies of the process of catalytic ——— evolution on the epoxy-resin-impregnated graphite-based mercury film electrode (Cukrowski, Korolczuk) 127
Where is the actual site for ——— evolution? Isotopic analysis for NiO-deposited $SrTiO_3$ photocatalyst (Baba, Fujishima) 319

Interface of two immiscible electrolyte solutions,
kinetics of salt extraction into the high-permittivity oil phase. Rate measurement by electrolysis at the ——— (Koryta) 323
Iodine,
electrodeposition of Pb onto Pt (111) surfaces containing ——— adlattices. Studies by low-energy electron diffraction and Auger spectroscopy (Stickney et al.) 293
Ionic adsorption,
——— from mixed electrolyte solutions at constant cationic strength (Dutkiewicz, Skołuda) 327
Iron,
electrochemistry of ———(III) complexes with salicylaldehyde thiosemicarbazone and its S-methyl derivative (Bjelica, Jovanović) 85
On the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot H_3PO_4 (Dhar et al.) 161
Iron tetrasulphonated phthalocyanines,
spectro-electrochemistry of cobalt and ——— (Nevin et al.) 217

Lead,
electrocatalytic influence of underpotential Tl, ——— and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions (Kokkinidis et al.) 135

Electrodeposition of ——— on Pt (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy (Stickney et al.) 293
Low-energy electron diffraction,
electrodeposition of Pb onto Pt (111) surfaces containing iodine adlattices. Studies by ——— and Auger spectroscopy (Stickney et al.) 293

Mercury,
adsorption and film formation of uracil derivatives at the ———/electrolyte interface in the presence of different supporting electrolytes (Wandlowski et al.) 339
Anodic oxidation of ——— in the presence of thioether acids. Methylthioacetic acid (Casassas et al.) 65
Studies of the process of catalytic hydrogen evolution on the epoxy-resin-impregnated graphite-based ——— film electrode (Cukrowski, Korolczuk) 127
Theoretical considerations on square wave and differential pulse voltammetry applied in anodic stripping with use of ——— film electrodes (Penczek, Stojek) 177
Methanol,
infrared spectroscopic study of ——— and formic acid adsorbates on a platinum electrode. Part I. Comparison of the infrared absorption intensities of linear CO(a) derived from CO, CH_3OH and HCOOH (Kunimatsu) 149
Methylthioacetic acid,
anodic oxidation of mercury in the presence of thioether acids. ——— (Casassas et al.) 65
$MoO(L\text{–}L)(S_2CNEt_2)_2$,
dependence of heterogeneous charge transfer rate on coordination environment in ——— complexes (Schultz) 169

Nickel oxide,
where is the actual site for hydrogen evolution? Isotopic analysis for ———-deposited $SrTiO_3$ photocatalyst (Baba, Fujishima) 319
N-phenylmaleimide,
comments on the paper "The electrochemical reduction of some fused ring systems" by H.M. Fahmy, B. Nashed, F.A. Khalifa, A. Abdel Moneim and M. Abdel Azzem, and on the short communication "On the electrochemical reduction of ——— and related compounds" by H. Lund (Fletcher) 159
Nucleation and growth,
statistical fluctuations in two-dimensional ——— processes (Barradas, VanderNoot) 17

Oligophenyls,
electroactive polymeric films from oxidative coupling of ——— (Schiavon et al.) 53

Phosphoric acid,
on the effect of the Fe^{2+}/Fe^{3+} redox couple on oxidation of carbon in hot ——— (Dhar et al.) 161
Phthalocyanines,
spectro-electrochemistry of cobalt and iron tetrasulphonated ——— (Nevin et al.) 217
Platinum,
electrodeposition of Pb onto ——— (111) surfaces containing iodine adlattices. Studies by low-energy electron diffraction and Auger spectroscopy (Stickney et al.) 293
Underpotential deposition of silver on polycrystalline ——— electrodes. Controlling phenomena derived from potentiostatic transients (Salvarezza et al.) 301
Polymeric films,
electroactive ——— from oxidative coupling of oligophenyls (Schiavon et al.) 53
Poly-tris(5,5′-bis[(3-acrylyl-1-propoxy)carbonyl]-2,2′-bipyridine)ruthenium,
electronically conducting ———-modified electrodes. Studies of bilayer films and solution redox reactions (Elliott et al.) 203
Potassium hydroxide,
effect of ——— solution on the surface properties of Teflon (Rotenberg et al.) 43
Pyridinecarboxaldehydes,
polarographic reduction of aldehydes and ketones. Part XXVI. Electroreduction and electrooxidation of ——— in alkaline solutions (Rusling, Zuman) 277
Polarographic reduction of aldehydes and ketones. Part XXIV. Electroreduction of ——— in acidic solutions (Rusling, Zuman) 245
Polarographic reduction of aldehydes and ketones. Part XXV. Electroreduction of ——— in aqueous buffered solutions (Rusling, Zuman) 255

Restricted diffusion,
effects of ——— at ultramicroelectrodes in

brain tissue. The pool model: Theory and experiment for chronoamperometry (Amatore et al.) 31
Rhodizonic acid,
electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of ——— and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions (Kokkinidis et al.) 135
Ruthenium dioxide,
oxidation of 4,4′-dichlorobiphenyl at a ——— anode (Laule et al.) 329

Salicylaldehyde thiosemicarbazone,
electrochemistry of iron(III) complexes with ——— and its S-methyl derivative (Bjelica, Jovanović) 85
Salt extraction,
kinetics of ——— into the high-permittivity oil phase. Rate measurement by electrolysis at the interface of two immiscible electrolyte solutions (Korta) 323
Silver,
underpotential deposition of ——— on polycrystalline platinum electrodes. Controlling phenomena derived from potentiostatic transients (Salvarezza et al.) 301
S-methyl,
electrochemistry of iron(III) complexes with salicylaldehyde thiosemicarbazone and its ——— derivative (Bjelica, Jovanović) 85
Square wave voltammetry,
theoretical considerations on ——— and differential pulse voltammetry applied in anodic stripping with use of mercury film electrodes (Penczek, Stojek) 177
Theory of multiple ——— (Fatouros et al.) 1
$SrTiO_3$,
where is the actual site for hydrogen evolution? Isotopic analysis for NiO-deposited ——— photocatalyst (Baba, Fujishima) 319
Submicroelectrodes,
analytical application of ——— in solutions containing little or no supporting electrolyte (Ciszkowska, Stojek) 189

Teflon,
effect of KOH solution on the surface properties of ——— (Rotenberg et al.) 43
Tetrahydroxy-1,4-benzoquinone,
electrocatalytic influence of underpotential Tl, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and ——— on Pt in acid solutions (Kokkinidis et al.) 135
Thallium,
electrocatalytic influence of underpotential ———, Pb and Bi monolayers on the electrochemical behaviour of rhodizonic acid and tetrahydroxy-1,4-benzoquinone on Pt in acid solutions (Kokkinidis et al.) 135
Thioether acids,
anodic oxidation of mercury in the presence of ———. Methylthioacetic acid (Casassas et al.) 65
Thiosemicarbazone,
electrochemistry of iron(III) complexes with salicylaldehyde ——— and its S-methyl derivative (Bjelica, Jovanović) 85

Ultramicroelectrodes,
effects of restricted diffusion at ——— in brain tissue. The pool model: Theory and experiment for chronoamperometry (Amatore et al.) 31
Uracil,
adsorption and film formation of ——— derivatives at the mercury/electrolyte interface in the presence of different supporting electrolytes (Wandlowski et al.) 339
